

## **Program Manager**

**Job Overview:** The Program Manager will join a dynamic small aerospace company where you will take on program management roles, on missions that make a big difference to the United States and our allies. Our customers are a mix of US Government prime contracts plus contracts with important US prime contractors. You must have aerospace and defense products experience, and experience in high reliability hardware products. You will support multiple programs at any one time, multiplexing across product types such as batteries, RF and avionics assemblies. You will be active with customers, suppliers and help coordinate in-house team members working in engineering, production, assembly, and test to balance customer schedule needs. The right candidate will have demonstrated success in development and qualification programs, and production through test and delivery.

The Program Manager will have programmatic P&L responsibility for their programs/contracts, responsible for program financial performance to bidding expectations, and help manage customers and customer satisfaction. The program manager will be the primary customer interface for program execution and new business (follow-ons, change orders if appropriate) related to program. Must be willing and eager to work as a team member in a team environment. Execute program deliveries within company, managing to schedule and to budget. Support monthly program reviews within company and customer reviews as specified in contract.

You will join a collaborative, supportive team all housed in a single building. You may join the team on their daily walk through the neighborhood, enjoy the patio, pinball, mini-golf, or work out in our gym.

**In-Office job role:** This job role is 100% on-site, in Chatsworth, CA – not remote.

**Requirements:** Aerospace, high reliability hardware program management experience is required. US Citizenship is required. A college degree from an accredited university is a requirement, an engineering degree is a plus, and an advanced degree is a plus. You must demonstrate outstanding communications skills – written and verbal. The right attitude, the right experience and solid capability are considered the most important.
